

2nd INTERNATIONAL CONFERENCE
ON
**Environmental Geotechnology, Recycled Waste
Materials and Sustainable Engineering**

EGRWSE-2019

June 17-18, 2019

University of Illinois at Chicago, USA

CONFERENCE CHAIR

Krishna R. Reddy, Professor & Director,
Sustainable Engineering Research Laboratory,
Department of Civil and Materials Engineering,
University of Illinois at Chicago, USA

CO-CHAIR & ORGANIZING SECRETARY

Arvind K. Agnihotri, Professor and Head, Department
of Civil Engineering, NIT Jalandhar, India

CONVENOR

Ajay Bansal, Associate Professor & Head, Chemical
Engineering, NIT, Jalandhar, India

CO-CONVENORS

Sanjeev Naval, Associate Professor & Head, Civil
Engineering, DAVIET Jalandhar, India

Kanish Kapoor, Assistant Professor, Civil Engineering
NIT, Jalandhar, India

Girish Kumar, Graduate Research Assistant,
Department of Civil & Materials Engineering,
University of Illinois at Chicago, USA

ADVISORY COMMITTEE

Lalit Kumar Awasthi, India
(NIT Jalandhar Director)
Sanjay Kumar Shukla, Australia
Antonio Thomé, Brazil
Yan-Jun Du, China
Claudio Comeselle, Spain
Oznur Karaca, Turkey
Jeff Adams, USA
Surendra Kumar, USA
Junbom Park, South Korea
John Daniels, USA

Milind Khire, USA
Sivakumar Babu, India
Yeliz Yukeselen, Turkey
Raj Dhooli, USA
Sanjeev Bandi, USA
Ming Zhang, Japan
Kaimin Shi, Hong Kong
Eugeniusz Koda, Poland
Tamas Meggyes, Germany
Dennis G. Grubb, USA

EGRWSE-2019

2nd International Conference

On

**Environmental Geotechnology,
Recycled Waste Materials and
Sustainable Engineering**

June 17-18, 2019

University of Illinois at Chicago, USA

Organised by

**Department of
Civil and
Materials
Engineering**

University of Illinois
Chicago, Illinois-60607
USA

ABOUT UNIVERSITY OF ILLINOIS AT CHICAGO, USA

EGRWSE-2019 will be held in the premises of the Department of Civil and Materials Engineering (CME), University of Illinois Chicago (UIC), USA. Located in the heart of one of the world's great cities, UIC is a vital part of the educational, technological and cultural fabric of the region. As Chicago's only public research university with 30,000 students, 15 colleges, a hospital and a health sciences system, UIC provides access to world class excellence in vivid fields. The CME department at UIC offers programs leading to the BS, MS and Ph.D. degrees in Civil Engineering, and the MS and Ph.D. degrees in Materials Engineering. In particular, the Sustainable Engineering Research Laboratory (SERL) and the Geotechnical and Geoenvironmental Engineering Laboratory (GAGEL) at UIC is focused on addressing the trending challenges in the development of sustainable and resilient civil infrastructure and safeguarding the earth and environment by integrating the knowledge from emerging areas of sustainability, resiliency, infrastructure, water, energy and environment. The research at SERL and GAGEL has continually demonstrated a high level of technical excellence and quality in research through the development of innovative and pragmatic approaches that have been widely recognized and adopted for use.

ABOUT NIT JALANDHAR, PUNJAB, INDIA

National Institute of Technology (NIT), Jalandhar (erstwhile REC Jalandhar), was established in the year 1987 and attained the status of National Institute of Technology on October 17, 2002. As NIT, the Institute has a responsibility of providing high quality technical education in Engineering and Technology to produce competent technical manpower for the country. The Institute offers B. Tech. programmes in twelve disciplines of Engineering and Technology along with the research programmes leading to MSc, MTech and PhD degrees. The Institute has signed Memorandum of Understanding (MoU) with many prestigious institutes such as Ecole Centrale de Lille, France, University of Johannesburg, South Africa, the University of Bolton, UK, and the University of South Alabama, USA for the mutual academic exchange program and further strengthening of the academics and research.

ABOUT THE CONFERENCE

Sustainable Engineering is the process of using resources in a way that does not compromise the environment or deplete the materials for future generations. Sustainable engineering

requires an interdisciplinary approach in all aspects of engineering. All engineering fields should incorporate sustainability into their practice for an improved quality of life. Furthermore, with the creation of the Sustainable Development Goals, engineers will continue to play a decisive role in their success. The necessity for environment-friendly technologies in the future will require the expertise of engineers. Therefore, the UNESCO Engineering Initiative (UEI) is working with partners to develop engineering curricula that incorporate sustainability as an overarching theme.

The rapidly increasing population and rising living standards has caused the development of environmental geotechnology. When population increases, more land is needed; many soil deposits previously claimed to be unfit for residential housing and other construction projects are now being used. In a progressive society, rising living standards indicate an increase in industrial growth. Consequently, pollution of air, water, and land and urban refuse production becomes inevitable, thereby endangering the global environment. To cope with these problematic soil deposits and adverse environmental conditions, the present conventional construction technology requires, by necessity, a new direction. Problematic soil deposits on one hand and ground pollution problems on the other have challenged the current soil mechanics concepts and methods of analyzing soil behavior under varied environmental conditions. The environmental aspects of geotechnology have been expanded and their subsequent response to engineering behavior has paved way for the emergence of Environmental Geotechnology.

Recycling is beneficial in many ways and it primarily helps protect the environment. This is because the recyclable waste materials would have been burned or ended up in the landfill. Recycling more waste means, we do not depend too much on raw (natural) resources, which are already massively depleted. However, use of recycled waste materials require an understanding of their properties and characteristics for their beneficial use as engineering and construction materials.

CONFERENCE OBJECTIVE

EGRWSE-2018 conference marked a successful event on the state-of-the art research on sustainability, environmental geotechnics, and use of recycled waste materials for civil infrastructure. This EGRWSE-2019 again aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results about all aspects of Geoenvironmental Engineering, Waste Management, and Sustainable Engineering. It also

provides the premier interdisciplinary forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered, and the solutions adopted in this field.

CALL FOR ABSTRACTS

Academicians, researchers and practicing professionals are invited to submit abstracts on the following areas and related topics: Environmental Geotechnology, Recycled Waste Materials, and Sustainable Engineering. Upon the acceptance of abstracts, the authors should submit full papers, which will be peer reviewed and published in a Springer book. Selected papers will be published in special issues of journals. **Website to upload abstracts will be available on the conference website soon.**

IMPORTANT DEADLINES

Abstract Submission	November 23, 2018
Decision on Abstract	December 14, 2018
Full Paper Submission	February 18, 2019
Decision on Full Paper	April 15, 2019
Regular Registration	Before May 6, 2019
Late Registration	May 6-June 10, 2019
Spot Registration	After June 10, 2019

REGISTRATION FEE

Registration	Regular	Late	Spot
Delegates	\$250	\$300	\$350
Students	\$200	\$250	\$300

Website to register will be available on the conference website later.

ACCOMMODATION

A list of nearby hotels and paid homestays in the city will be communicated on the conference website. Please note that the accommodation is not included in the conference fee and the delegates are responsible for their own accommodation.

CONFERENCE LOCATION

Conference will be held on the UIC campus in the Illinois Room in Student Centre East (SCE) Building, 750 South Halsted Street, Chicago, IL 60607, USA.
